SALES PERFORMANCE REPORT

Business Insights and Recommendations, January – May 2026

Prepared for: The Board | Prepared by: Aisha Hamza | September 2026

1. Executive Summary

This report reviews the company's sales performance from January to May 2026, using the cleaned sales dataset and the accompanying Excel Sales Performance Dashboard. The company recorded ₦43.25M in revenue from 49 orders (591 units) and earned ₦9.37M in profit, an overall profit margin of 21.7%.

Revenue is growing, but the analysis shows that the products and orders that bring in the most revenue are not the ones that bring in the most profit. The five main findings are:

- **Electronics leads revenue, Accessories lead profit.** Electronics earn 55.0% of revenue but only 39.7% of profit.
- **Laptops and high-value orders are heavily discounted.** Laptops are the top seller but have the lowest margin (10.9%), and orders of ₦1M or more earn a 15.2% margin against 26.3% for standard orders.
- **Sales are concentrated in Lagos and Abuja.** Together they bring in 54.1% of revenue.
- **Monthly revenue is growing but uneven.** April dipped 22% because of fewer orders, then May reached a five-month high.
- **Card and transfer dominate payments.** Card and transfer make up 78.6% of revenue, and cash is used only by retail customers.

2. Scope, Data and Method

The analysis covers all 49 orders in the cleaned Week 1 dataset, placed between 5 January and 28 May 2026 across seven cities. Revenue is calculated as gross sales less discounts, and profit is revenue less total cost. Orders are classed as "High Value" at ₦1,000,000 or more in revenue, and "High Profit" at ₦250,000 or more in profit. All figures come from PivotTables built on the dataset, and the charts in this report are taken from the Sales Performance Dashboard, which includes a City slicer for filtering.

Data notes

- Order ORD035 (₦798,000) had no payment method recorded. It has been classified as Card, the most common method for Retail Electronics orders (5 of 8). This affects 1.8% of revenue and does not change any total.
- Orders ORD033, ORD034 and ORD045 carry ship dates earlier than their order dates. They are flagged in the dataset but retained in all totals.

3. Overall Performance

Key Performance Indicator	Result
Total Revenue	₦43,251,900
Total Profit	₦9,367,900
Profit Margin	21.7%
Total Orders	49
Total Units Sold	591
Average Order Value	₦882,692

Revenue is split almost evenly between corporate customers (50.2%) and retail customers (49.8%), but retail customers earn a much higher margin (26.1% against 17.2%). Among the ten salespeople, Tolu leads with ₦5.83M and Fatima is lowest with ₦2.69M, though Fatima has the best margin of the team (29.4%). Full breakdowns by category, city, product, salesperson and payment method are in the Appendix.

4. Business Insights

Insight 1: Electronics drives revenue, but Accessories drive profit

Electronics generate ₦23.78M, or 55.0% of company revenue, yet contribute only 39.7% of profit because their margin is just 15.6%. Accessories account for 21.4% of revenue but 35.6% of profit, earning ₦3.33M against ₦3.71M for Electronics, at a margin of 36.0%. Furniture sits in between at 22.7%.

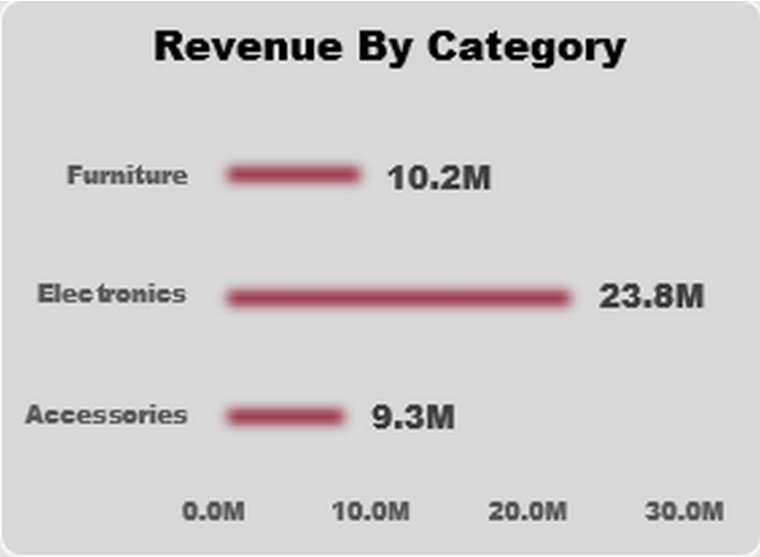

Figure 1: Revenue by Category (Sales Performance Dashboard).

The dashboard chart shows revenue only. Profit tells a different story:

Category	Revenue	Share of revenue	Profit	Share of profit	Margin
Electronics	₦23,784,550	55.0%	₦3,714,550	39.7%	15.6%
Furniture	₦10,199,300	23.6%	₦2,319,300	24.8%	22.7%
Accessories	₦9,268,050	21.4%	₦3,334,050	35.6%	36.0%

Recommendation: Promote Accessories more actively, especially as add-ons to Electronics orders, since each Accessories naira earns more than twice the profit of an Electronics naira.

Insight 2: Laptops and high-value orders bring revenue but little profit

Laptops are the top product at ₦11.72M (27.1% of revenue), but they have the lowest margin of any product at 10.9%. At list price a laptop earns a 20% margin (₦450,000 price against ₦360,000 cost), but discounts averaging 9.6% roughly halve it. On order ORD015 a 15% discount left a profit of just ₦90,000 on a ₦1.53M sale.

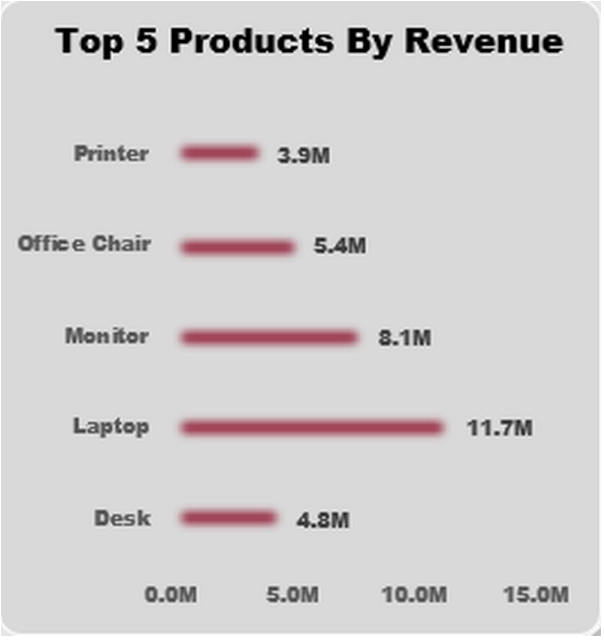

Figure 2: Top 5 Products by Revenue (Sales Performance Dashboard).

Laptop leads on revenue, but its margin is roughly half that of Office Chair, Desk and Printer:

Product	Revenue	Share of revenue	Profit	Margin
Laptop	₦11,722,500	27.1%	₦1,282,500	10.9%
Monitor	₦8,112,300	18.8%	₦1,602,300	19.8%
Office Chair	₦5,448,500	12.6%	₦1,308,500	24.0%
Desk	₦4,750,800	11.0%	₦1,010,800	21.3%
Printer	₦3,949,750	9.1%	₦829,750	21.0%

The same pattern appears across all large orders:

Order type	Orders	Revenue	Share of revenue	Share of profit	Margin
High Value (≥ ₦1,000,000)	12	₦18.09M	41.8%	29.4%	15.2%
Standard (< ₦1,000,000)	37	₦25.17M	58.2%	70.6%	26.3%

The 12 high-value orders make up 41.8% of revenue but only 29.4% of profit.

> **Recommendation:** Set a discount ceiling for high-value orders and laptops, and require approval for discounts above it, so that large orders do not give away most of their margin.

Insight 3: Sales depend heavily on Lagos and Abuja

Lagos alone contributes ₦14.56M, or 33.7% of revenue. Lagos and Abuja together contribute 54.1%. At the other end, Kaduna is the smallest market at ₦2.69M (6.2%) yet has the best margin of any city at 29.4%, followed by Enugu (26.9%) and Kano (26.2%). Growth in these cities would be profitable growth.

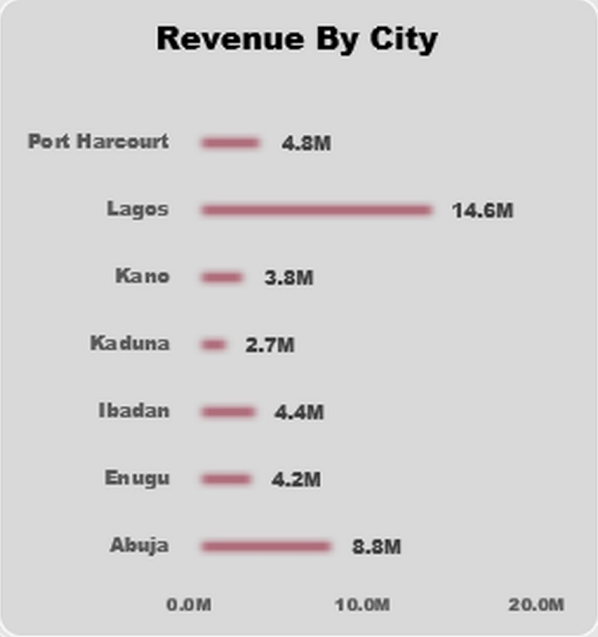

Figure 3: Revenue by City (Sales Performance Dashboard). City margins are in Appendix B.

> **Recommendation:** Invest in Kaduna, Kano and Enugu to reduce dependence on Lagos, while protecting the Lagos and Abuja accounts that currently carry the business.

Insight 4: Revenue is growing but uneven month to month

Revenue rose from ₦7.61M in January to ₦9.70M in March, fell 22% in April to ₦7.55M, then reached a five-month high of ₦10.08M in May, up 34%. April had the fewest orders (8, against 10 or 11 in every other month), so the dip came from lower sales volume rather than lower prices. Profit margin stayed steady between 20% and 23% throughout.

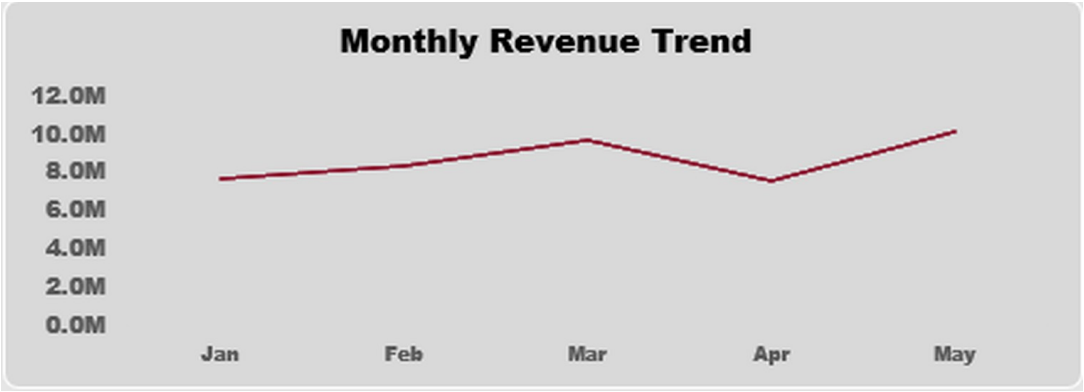

Figure 4: Monthly Revenue Trend (Sales Performance Dashboard). Monthly profit and orders are in Appendix E.

> **Recommendation:** Investigate what held back April, whether stock, staffing or demand, so that a similar dip can be prevented, and repeat whatever worked in May.

Insight 5: Card and transfer dominate payments, and cash is a retail habit

Card is the largest payment method at 47.1% of revenue, followed by transfer at 31.5% and cash at 21.4%. All 23 corporate orders were paid by card or transfer, while cash was used only by retail customers.

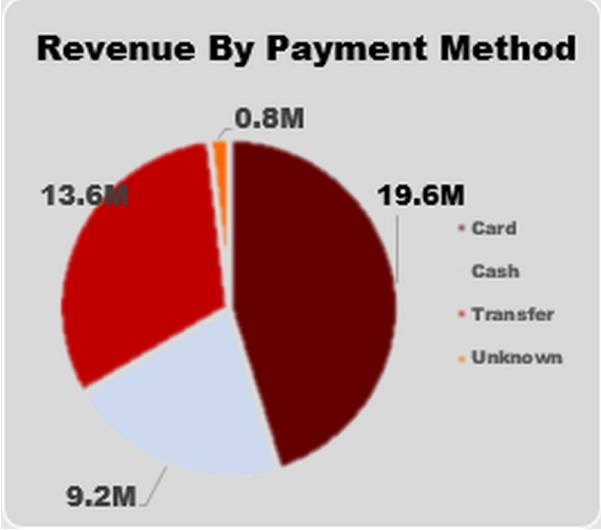

Figure 5: Revenue by Payment Method (Sales Performance Dashboard).

Payment method	Orders	Revenue	Share of revenue
Card	19	₦20,359,300	47.1%
Transfer	17	₦13,645,800	31.5%
Cash	13	₦9,246,800	21.4%

> **Recommendation:** Keep card and transfer payments smooth and reliable for corporate buyers, since that is where large orders come from, and treat cash handling as a retail-only process.

5. Summary of Recommendations

Area	Recommended action
Product mix	Promote Accessories, especially as add-ons to Electronics orders.
Pricing	Set and enforce a discount ceiling for laptops and high-value orders.
Geography	Grow Kaduna, Kano and Enugu while protecting Lagos and Abuja.
Sales planning	Investigate the April dip and repeat the practices behind May's result.
Payments	Prioritise card and transfer for corporate customers; keep cash for retail.

6. Conclusion

The company is growing and profitable, with a 21.7% margin across ₦43.25M in revenue. The largest opportunity is not selling more, but selling better: shifting the mix towards higher-margin Accessories, controlling discounts on laptops and large orders, and building the smaller, more profitable cities. Acting on these five points would raise profit without needing a matching rise in revenue.

Appendix: Supporting Tables

A. By Category

Category	Revenue	Profit	Margin	Units	Orders
Electronics	₦23,784,550	₦3,714,550	15.6%	95	21
Furniture	₦10,199,300	₦2,319,300	22.7%	113	13
Accessories	₦9,268,050	₦3,334,050	36.0%	383	15

B. By City

City	Revenue	Profit	Margin	Units	Orders
Lagos	₦14,555,450	₦3,186,450	21.9%	223	15
Abuja	₦8,841,150	₦1,751,150	19.8%	78	10
Port Harcourt	₦4,789,050	₦854,050	17.8%	45	5
Ibadan	₦4,386,000	₦661,000	15.1%	18	4
Enugu	₦4,222,750	₦1,137,750	26.9%	97	5
Kano	₦3,772,300	₦988,300	26.2%	64	5
Kaduna	₦2,685,200	₦789,200	29.4%	66	5

C. By Product

Product	Revenue	Profit	Margin	Units	Orders
Laptop	₦11,722,500	₦1,282,500	10.9%	29	8
Monitor	₦8,112,300	₦1,602,300	19.8%	42	7
Office Chair	₦5,448,500	₦1,308,500	24.0%	69	6
Desk	₦4,750,800	₦1,010,800	21.3%	44	7
Printer	₦3,949,750	₦829,750	21.0%	24	6
Headset	₦3,251,850	₦1,051,850	32.3%	100	5
Keyboard	₦3,028,200	₦994,200	32.8%	113	5
Mouse	₦2,988,000	₦1,288,000	43.1%	170	5

D. By Salesperson

Salesperson	Revenue	Profit	Margin	Units	Orders
Tolu	₦5,826,400	₦1,077,400	18.5%	55	5
Ada	₦4,789,050	₦854,050	17.8%	45	5
Chioma	₦4,658,400	₦743,400	16.0%	26	5
Kunle	₦4,455,000	₦1,085,000	24.4%	96	5
Seyi	₦4,386,000	₦661,000	15.1%	18	4
Ade	₦4,274,050	₦1,024,050	24.0%	72	5
Emeka	₦4,222,750	₦1,137,750	26.9%	97	5
Zainab	₦4,182,750	₦1,007,750	24.1%	52	5
Musa	₦3,772,300	₦988,300	26.2%	64	5
Fatima	₦2,685,200	₦789,200	29.4%	66	5

E. By Month

Month	Revenue	Profit	Margin	Orders
Jan 2026	₦7,612,450	₦1,656,450	21.8%	11
Feb 2026	₦8,320,000	₦1,799,000	21.6%	10
Mar 2026	₦9,695,150	₦2,088,150	21.5%	10
Apr 2026	₦7,547,700	₦1,533,700	20.3%	8
May 2026	₦10,076,600	₦2,290,600	22.7%	10
